

PROFESSIONAL SUMMARY

Java Developer with 3+ years of experience specializing in RESTful Web Services, Spring Framework. Demonstrated expertise in designing and developing software solutions including a disaster alert system (KSDMA) and an astronomy visualization application (NASA API). Led the implementation of RESTful APIs with Spring Boot, enhanced security through JWT/OAuth2 integration, and deployed applications using AWS Elastic Beanstalk and Docker. Proficient in testing methodologies using JUnit and Mockito, with experience documenting APIs through Swagger-OpenAPI. Strong background in cross-functional communication, technical troubleshooting. Committed to continuous learning and delivering secure, high-performance applications that address real-world challenges.

FUNCTIONAL EXPERTISE

- Design and Development
- Teamwork and Cross-functional Communication
- Creative Problem Solving / Strategic Thinking
- Testing and Deployment
- Corporate Training and Delivery
- Troubleshooting and Debugging

FUNCTIONAL EXPERTISE DEMONSTRATED

[Test Yantra Software](#)

March 2022 - August 2023

May 2024- September 2025

An IT services and consulting firm with 6000+employees serving IT Skills Development, Software Design & Development CoE , Testing as a Service, and Application/Product Deployment and Support.

Associate Software Engineer(Java Developer)

Analyzes requirements, design RESTful API for Early Warning Dissemination System(EWDS), leads on-site training sessions, mentored and trained many teams and worked on internal projects.

- **Design & Development:** Led the design and development of RESTful APIs for the Early Warning Dissemination System (EWDS) using Spring Boot, optimizing data retrieval and enhancing user experience. Integrated JWT with OAuth2 for session-based authentication and improved application security with Spring REST Security.
- **Testing & Deployment:** Developed and maintained Unit and Integration Tests using JUnit and Mockito. Deployed MySQL containers on AWS Elastic Beanstalk and documented APIs using Swagger-OpenAPI.
- **Corporate Training:** Conducted over 40+ training sessions on professional topics and technologies, mentoring teams and improving productivity.

- **Technical Troubleshooting:** Resolved critical bugs and collaborated with teams for effective problem-solving and debugging.
- **Teamwork:** Worked closely with cross-functional teams to diagnose issues, develop test cases, and improve project outcomes.

RELEVANT PROJECTS

Early Warning Dissemination System (KSDMA): Developed a disaster alert system for timely notifications during emergencies. Designed and built RESTful APIs with Spring Boot to improve data access and system usability. Implemented security features using JWT with OAuth2 for authentication and Spring REST Security for overall protection. Created and maintained Unit and Integration Tests with JUnit and Mockito to ensure system reliability. Set up MySQL containers on AWS Elastic Beanstalk for deployment and documented the API structure using Swagger-OpenAPI. Worked with different teams to identify issues, develop solutions, and improve system functionality. The project helps authorities send warning messages to at-risk communities during natural disasters.

Nasa API Implementation (Remote): Experience the **cosmos** with the **Nasa** API Implementation project, a **full-stack web application** delivering captivating **Astronomy Picture of the Day** and **Mars Rover Photos**. Developed with Spring Boot, MySQL, and cutting-edge Spring Framework, it ensures security, performance, and seamless user interaction. The project seamlessly integrates **RESTful web services** for fetching Astronomy Pictures of the Day and Mars Rover Photos. Its Bootstrap-enhanced front-end, along with deployment on **AWS Elastic Beanstalk** using Docker, promises a visually captivating and dependable astronomical exploration experience. Admin controls, Swagger documentation, and rigorous JUnit testing elevate this celestial journey to new heights.

EDUCATION

Bachelor Of Engineering (Computer Science) . [East West Institute Of Technology](#) (Bengaluru, IN)

OTHER RELEVANT INFORMATION

Additional Languages: Kannada, Hindi

Technical Skills:

Programming Languages: Java, Java 8

Frameworks: Spring Boot, Spring Framework (Core, Hibernate JPA, RESTful Web Services, MVC, Spring Security), Thymeleaf

Databases: MySQL

Testing: JUnit, Mockito, Test Containers

Build Tools & VC: Maven, GitHub, Postman, Swagger API, OpenAPI, XML/JSON, OAuth2
